WEBeRX and WEBeEPCS INTEGRATED PRESCRIPTION MANAGEMENT SOLUTION

WEBeRX - Prescription Management Solution

WEBeDoctor understands that professional medical practice offices need more than the average prescription writing software application. We have collaborated with physicians, Surescripts, and The Federal Government in order to develop a safer, user-friendly, dynamic, cost-effective, workflow enhancement option, which seamlessly integrates with our Fully Integrated Physician's Office & Ambulatory Surgery Center Solutions.

WEBeRX: Everything you require to safely and securely e-prescribe non-controlled drugs. It makes prescribing more efficient, advances patient medication adherence, and increases convenience for your patients.

WEBeRX automatically provides you with the advanced Surescripts History & Benefits application, at no additional charge.

- The “History” application will provide the physician with a powerful tool, to mitigate the addictive behavior of the “Doctor Shoppers”.
- The “Benefits” application will provide the physician with a powerful tool to mitigate prescribing medications that are not covered by the patient’s medical insurance.

WEBeEPCS - A Certified Secure Solution For e-Prescribing Schedule II-V Controlled Substances

WEBeEPCS provides the control to seamlessly send electronic prescriptions for controlled substances to retail, or mail order pharmacies, within the same workflow you use for WEBeRX to e-prescribe non-controlled drugs. It makes prescribing more efficient, advances patient medication adherence, and increases convenience for your patients.

WEBeEPCS protects your practice against fraud, abuse and doctor shopping. You can now legally, and safely e-prescribe Schedule II-V controlled substances with confidence, security, and peace of mind.

WEBeEPCS is a Drug Enforcement Agency (DEA) and Surescripts-certified solution for e-prescribing controlled

substances. Legal since 2010 at the Federal level, controlled substance e-prescribing has recently been legalized in all 50 U.S. States and the District of Columbia, and more than 40% of pharmacies nationwide accept controlled substance e-prescriptions.

WEBeEPCS Benefits

► The WEBeEPCS, Controlled Substance e-Prescribing Solution is certified by Surescripts and the DEA (Drug Enforcement Agency).

Now, you can discard those tamper proof prescription pads, and prescribe controlled substances, accurately and securely. WEBeDoctor EPCS enables you to electronically write and send new & refill prescriptions electronically within seconds.

► Patient Safety:

Prior to routing prescriptions, WEBeDoctor automatically performs a complete drug utilization review; checking drug-to-drug interactions and drug-to-allergy interactions. Medication reconciliation is performed by accessing the patient medication history, across multiple providers through a single point of access.

► Patient Convenience:

The WEBeEPCS Automatic Patient Eligibility and Formulary Verification process saves your patients, and your practice, time and money. Also, to keep your patients informed, and involved in their health care, WEBeEPCS automatically updates the WEBeDoctor Patient Portal Current Medications display.

► Patient Records:

WEBeDoctor automatically validates, tracks patient medication history, and allows you to easily record patient allergies, problems, vital signs, and notes.

► Ease of Use:

Utilizing WEBeDoctor ease of use features, once a patient is selected, you can create, and send e-scripts with a few clicks of your mouse, and no typing!

► Cost Effective:

WEBeEPCS is included in our Fully Integrated Physician's Office and Ambulatory Surgery Center Solutions. NO more prescription pads expenses.

- Choose from hard and/or soft token options
- Unique pin and e-signature for each transaction
- Complies with DEA, NIST, and Surescripts requirements

*You will need to purchase a DEA Approved Certificate & Token for Electronic Prescribing of Controlled Substances available at:
