

Fully Integrated Web-Based EHR and Practice Management Software Solution for Podiatry Experts

With over 10 years, experience WEBeDoctor has collaborated with Podiatry experts, to connect Podiatrist's with a practice management system. Integrating WEBePodi® in your podiatry practice allows more patients to be seen each day, reducing interrelated costs with managing a podiatry practice, and ensures patient privacy and safety. WEBePodi® by WEBeDoctor is the most efficient way to increase your profits, manage patient records and streamline your office workflow.

WEBePodi® Electronic Health Records (EHR/EMR) meets the ARRA Meaningful Use criteria. It is a Drummond Group® Certified Ambulatory EHR, ONC-ATBC Certified Complete EHR supporting "Meaningful Use" 2011-2012, and not to mention fully HIPAA Compliant. WEBePodi Practice Management, EMR, ePrescribing, and Billing Software (ICD-10 compatible) is a fully integrated, single database software solution.

The podiatry templates were developed by Podiatrists for single and multi- physician offices, striving to not only give you the software to automate patient record documentation, but storage, retrieval, and the tools to make sure you optimize the technology for fast and complete return on investment (ROI).

RIGHT FOOT examination:
Inspection: exam of phalanges reveals swollen and bruised great toe.

RIGHT ANKLE examination:
Inspection: distal Achilles ecchymosis;
Palpation: proximal Achilles tendon pain;
Sensation: deficit noted in (L5) and (S1) distribution;
Muscular strength: 3/5 dorsiflexors 2/5 plantarflexors 3/5 pronators; 4/5 supinators;
Range of Motion: limited active ROM with plantarflexion;
Maneuvers: (-) anterior draw sign (-) tibial torsion (+) Homans sign; (+) Thompson test;

VISIT NOTE

SUBJECTIVE

CC: Right Foot Pain

HPI: Eric Davis complains of right foot pain. The location of the discomfort is primarily the great toe. It does not radiate. The pain initially began yesterday. The pain began after he stubbed his great toe on a chair leg. Palliative factors include ice and NSAIDs. The pain increases with movement of toes.

Family Hx: Father: Type 2 Diabetes, Obesity; Mother: Breast Cancer (at age 38)

Current Medications: Naprelan 500 - sodium 550 mg tablet, extended release (1 Tablet(s)/As Needed); Ketoprofen ER - 200 mg capsule, extended release (1 Tablet(s)/As Needed); Penlac Nail Lacquer - 8 solution (1 Drop(s)/Once Daily); Terbinafine Hydrochloride, Topical - 1 cream (1 Drop(s)/Once Daily)

WEBePodi® Benefits

► Maintain a Patient-Centered Practice:

Patient information is accessed instantly. Complete patient medical records can be viewed at a glance. WEBePodi® captures all patient related messages and records them to the appropriate medical record. Many podiatrists have found point-of-care charting improves overall documentation and compliance. WEBePodi® allows for more comprehensive documentation in less time.

► Facilitate Risk Management:

Illegible charts and prescriptions are a thing of the past! Patient charts are securely stored offsite. Since records are automated the risk of documentation audits are significantly reduced. Errors caused by illegible handwriting, unclear abbreviations, dose errors, unclear orders, or fax clarity are done away with. Compliance with HIPAA regulations is much easier to meet as well.

► Web-Based:

WEBePodi® web-based system allows for operational status and activity to be monitored without being physically in the communications center. A web-based system provides for remote access to live information without

sacrificing security. Multiple users can be on the system at the same time. Mobile devices such as mobile phones, iPad®, netbook, laptops as well as desktops can access the system at the same time.

► Security:

WEBePodi® uses the highest security available, 128bit encryption, the same encryption used for online banking. Information can be restricted at the user level; logging actions without sacrificing data or security integrity.

► Revenue Cycle Management:

WEBePodi® has complete revenue cycle management. WEBePodi® allows podiatrists to determine insurance eligibility and the patient's insurance coverage. This allows for the podiatrist to reduce denials and increase reimbursement by providing medically necessary services. This improves the workflow process and allows the staff to accurately authorize services, validate coverage, and get copayments prior to the patient's appointment.

In addition, WEBePodi® allows for a streamlined billing and electronic claims processing. WEBePodi® provides analysis and reporting capabilities so podiatry professionals can

better manage insurance payers as well as individual cash patient accounts.

► Improve Time Consuming Office Processes:

Searching for lost charts is time consuming and your staff could be more efficient. WEBePodi® eliminates time lost searching for misplaced charts because documentation is written at the point of care and organized electronically right away. Charts, filing and folders are all eliminated — there is nothing to misplace or lose! Patient information can be shared among your staff to complete multiple tasks at once.

► Cost:

Since WEBePodi® is web-based; the cost for a complete solution is less expensive than traditional client/server based software. There is no need for expensive servers or data rooms. Multiple devices can be used with WEBePodi® including Apple iPad®, mobile phones, netbooks, notebooks, and even desktop computers, saving your company capital to invest elsewhere. Additional costs for updates and users are a thing of the past. All updates and additional users are included in the cost.

Hardware and Software

Requirements

Workstations:

- Apple or PC
- Pentium 4 class or Better
- 2GM RAM or Higher
- 800x600 screen resolutions or Better
- Windows XP Professional or Higher

Broadband Internet Connection:

- DSL or Better

Internet Browser:

- Microsoft explorer 7 or Higher
- Mozilla Firefox, Safari, or Google Chrome

Software:

- Adobe Acrobat Reader 7 or Higher
- Microsoft Word 2003 or Higher
- Microsoft Excel 2003 or Higher

Recommendations

Tablet PCs:

- Apple iPad (Version 1 or 2) or Better
- Dell Inspiron Duo or Better
- HP Touchpad or Better

Pen Tablets:

- HP Compaq TC4400 or Better
- Toshiba Portege M750 or Better
- Dell Latitude XT2 or Better

Line Printers:

Windows compliant Laser Printer

Label Printers:

- Dymo LabelWriter 450 Turbo or Better
- *Avoid all-in-one machines (print/fax/scan)
- *Avoid Dot Matrix printers

Full Sheet Scanners:

- TWAIN-compliant full-sheet scanner
- Fujitsu ScanSnap S1500/S1500M or Better

Card Scanner for ID/Insurance Cards:

- Simplex, Model PS665-SS or Better

Signature Pad:

- ePad by Interlink electronics VP9801 or Better
- Wacom Sign Pad STU-300 and Sign Doc or Better

Software:

- Dragon Medical 10.1 Dictation Software or Better
- Sign Doc for Pen Tablet by Softpro

WEBePodi® Features

- Drummond® 2011 certified system
- ARRA Approved for "Meaningful Use"
- Workflow Management
- ASP Based
- Specialty Specific Procedure Templates
- Automatic Referring Physician Letter
- E&M Coding Assistance for Podiatry
- Electronic Prescription Writing
- Decision Support (ADE, Coding)
- Fully Integrated Billing Module
- Document/Image Management
- Tablet PC and iPad Enabled
- HL7 Custom Interfaces
